HAPPY NEW YEAR!

Geese and turkeys for Christmas.
H. S. YOUNG, Budd Avenue.

Men's Leather Slippers in Black and Tan at the Campbell Shoe Store.—Adv.

Arthur Schnackenburg underwent another operation Tuesday morning at the hospital, this latter being for an abscess.

Mr. and Mrs. E. A. Barker of N. Central Ave., left Saturday for an extended visit at points in the southern part of the state.

Mrs. Jessie Schuyler and son, Clare, arrived from Grinnell, Ia., Monday, for a visit with her brother, George, and family.

Russell Kennedy went to Oakland today to attend a meeting of the legislative committee of the Realty Men's Federation, of which he is a member.

Mr. and Mrs. Philander Arnett of Sunnyside celebrated their fortieth wedding anniversary yesterday with a little home party. Their daughters remembered with presents appropriate to the day.

Geb. E. Speegle and family came over from Morgan Hill Christmas to spend several days with Mr. Speegle's parents. George is recovering from a severe attack of the grippe, but is around wishing his friends the compliments of the season.

W. T. Alexander returned today from his Christmas visit at San Francisco.

Lady's Felt Juliette's in Black, Brown and Gray Colors at the Campbell Shoe Store.—Adv.

The Farmers Union packed ten boxes of prunes and apricots for C. J. Ringe who sent them to Vancouver and other Canadian points.

Now that Xmas is past, you can still save money by patronizing the ORCHARD CITY DRUG CO., Campbell's Accommodating Cut Rate Druggists.—Adv.

The San Jose Chamber of Commerce has selected a committee to confer with Santa Cruz tomorrow for the purpose of coming to an agreement on the route of the state highway into the State Park.

Mr. and Mrs. Oluf Strom entertained at six o'clock dinner last evening, Messrs and Mesdames W. Von Christianson, J. L. Hagelin and Mr. Lee Hudson, foreman on the John Brynteson ranch at Turlock.

Wanted—Middle aged man, or woman to demonstrate the value of simple Food and Home remedies, in the home.

Position, dignified, pleasant and profitable. Apply at the store.

F. B. HOLMSTEAD,
General Agent.

Mr. and Mrs. L. T. Cook entertained Mr. and Mrs. C. B. Archibald and daughter, Letitia, of Vancouver, B. C., and Mr. and Mrs. Geo. Beaver and family of Palo Alto, at Christmas dinner. The Archibalds left Thursday evening for Los Angeles to remain thru the winter.

The Fabinger home was the scene of a large gathering of relatives for Christmas. In addition to the immediate family, Mr. and Mrs. Jas. Swane of Santa Rosa, Miss Sarah Brown of Saratoga, and Mrs. Vivian Winkler of San Francisco partook of the holiday cheer with them.

The High School Board has decided to have a coat of dustless floor dressing applied to all of the floors of the High School building. This will afford the much to be desired relief from dust conditions, the curse of school rooms, and make the rooms sanitary, wholesome and much more pleasant to work in.

As prophesied by the Press last week, Co B of San Jose went down to defeat on the local out-door court Christmas afternoon by a score of 29 to 16. The game was fairly free from roughness and all went smoothly until the second half when Murphy entered the game. Then the crabbing began, for said lad is noted for his continual complaining on the decisions. The high line-up was, Righter and Freyschlag, forwards; Kennedy, center; Vollman and Scholz, guards.

Joint Installation

A number of the local Masons are planning to attend the joint installation of officers which occurs at Masonic Temple, San Jose, Saturday evening, Dec. 28, at 7:30.

The lodges joining in the installation are, Friendship Lodge No. 210, Charity Lodge No. 362, and Fraternity Lodge No. 399, and Wm. Parker Filmer, Grand Master of the Jurisdiction of California will preside. The following officers have been chosen to serve Charity Lodge for 1913.—

J. F. Duncan	Worshipful Master
C. H. Whitman	Senior Warden
F. W. Snow	Junior Warden
S. R. Watte	Treasurer
Jas. Fablinger	Secretary
S. A. Maulto	Chaplain
W. E. Merrill	Senior Deacon
F. O. Putliff	Junior Deacon
L. D. Bohnett	Marshal
S. B. Smith	Steward
O. W. Bryant	Steward
Chas. Townsend	Tyler

Sunnyoaks Spicebox

Miss Lucia Shorrock came up from Kernan, where she is teaching, to spend her vacation with her uncle, A. A. Purmort, and friends at Saratoga.

Mr. Watross, on the old Dr. Moore place, has put in a new centrifugal pump. May his well never go dry.

Mrs. F. Savage, who has been suffering with a sprained ankle for several months, sprained the other foot, and has been under the Doctor's care.

A small company of friends visited the home of Mr. and Mrs. Richmond, Christmas night, with a donation to commemorate their china wedding.

Mr. and Mrs. M. E. Purmort entertained the Purmort family Christmas day.

Mrs. Olson and little daughter of San Francisco are making an extended visit with Mrs. Olson's parents, Mr. and Mrs. S. G. Nelson.

Mrs. F. H. Ulrichs and son, Herman, spent Christmas with Mrs. Ulrichs' parents in Alameda.—Cor.

Townsend--Shaffer

A very pretty wedding was solemnized at six o'clock on Christmas night at the home of Mr. and Mrs. Chas. Townsend on North Central Ave., when their oldest daughter, Grace, was united in marriage to Leslie E. Shaffer of Mercer, Pa.

Mrs. Shaffer, who has resided in Campbell for several years, has a host of friends who wish her much joy. She has endeared herself to the community and church, by her loving and faithful service at all times. She has been pianist for the Christian Endeavor and evening service and also the Sunday School for several years. Mr. Shaffer, while not so well known here as Mrs. Shaffer, has proven himself a young man of sterling character and has a great many friends here in Campbell.

The ceremony was performed by the Rev. Geo. E. Atkinson, who used the simple and beautiful ring service. The bride looked very lovely in a gown of white crepe meteor, with tulle veil held in place by sprays of lilies-of-the-valley, and carrying a shower bouquet of lilies-of-the-valley.

Mrs. A. L. Adam, wearing her wedding gown and carrying a bouquet of delicate pink carnations, acted as matron of honor, and Mr. Adam as best man. The bridal party proceeded to the parlor to the strains of Lohengrin's Wedding March, played by Miss Myrtle Arnett. They stood beneath a large floral bell, composed of smilax and double marguerites, suspended from the center of a curtain of smilax that extended across the corner of the room which was banked with smilax. Only the immediate relatives and closest friends of the family were present at the ceremony.

Immediately after the ceremony the guests were served a delicious wedding supper in the dining room, which was beautifully decorated with redwood branches, ferns, and smilax. The tables were beautified with smilax, violets, and marguerites, and the large double doorways were festooned with smilax and Christmas bells. The decorations were the work of Mrs. A. L. Adam assisted by Mrs. Mabel Henry. During the supper, Mrs. Claude Gard rendered some beautiful selections on the piano. The supper was followed by a large reception, when a host of friends came to congratulate the happy pair. The bride received a large number of very beautiful and useful gifts.

After the reception, Mr. and Mrs. Ed. Bartlett, cousins of the bride, took Mr. and Mrs. Shaffer to San Jose in their automobile. From there they proceeded to San Francisco and the Bay Cities for their honeymoon. The bride wore a handsome tailored suit of ink blue serge for traveling. Mr. and Mrs. Shaffer will be at home to their friends at the old parsonage on North Central Ave., after Jan. 15, 1913. Miss Pearl Townsend, sister of the bride, caught the bride's bouquet. Among the relatives present were, Mr. and Mrs. L. C. Watson, Mrs. Castle, Miss Louise Watson, and Mr. and Ed. Bartlett and family.

Birthday Party

Saturday evening, Dec. 21st, the Missouri Ranch, on the Santa Clara-Los Gatos Road, was the scene of a jolly gathering of friends and neighbors who enjoyed the hospitality of Mr. and Mrs. Ringe, in honor of Mrs. Ringe's birthday.

The house was beautifully decorated with palms, pepper berries and flags. Several games and a variety of amusements were carried on during the evening.

The game which created the most merriment was called "Klondyke." Each person was started on a hunt to find a given number which gave them a prize when located, bugles, horns, whistles and such.

Mrs. Ringe, No. 40, who could not locate her number was finally directed to the parlor, where she was much surprised to find a mission rocker, the gift of several friends. Among other presents, Mr. and Mrs. Thorpe presented her with a brass fern-basket and fern, and the Misses Denny and Miller, individual nut dishes.

The following friends were invited Messrs. and Mesdames Bates, Thomason, Olds, Dunn, A. Purmort and niece, Miss Shorrock, Thorpe, Bangs and son, Frank, Curry, Nelson, Ellison and father, Mr. Kinnear, Oliver, Ridley and family, Alexander, Mrs. Scholz and family, Mrs. Sadler, Mrs. Bent, Miss Edith Bent, and the Misses Denny and Miller of Cleveland, Ohio.

Mrs. Bangs, Mrs. Dunn and Miss Bent assisted Mrs. Ringe during the evening. At a late hour all departed wishing Mrs. Ringe many happy returns of the day and glad that they had taken part in the new game, "Klondyke."

M. E. Sunday School

At the annual election of officers held recently by the Methodist Sunday School, the following were chosen: Supt., J. C. Gordon; 1st. Vice, M. Trezona; 2nd Vice, A. D. Van Arsdell; Secy, S. G. Rodeck; Treas. Elva Pope; Pianist, Clara Pope; Supt. Primary Dept., Mary Clark; 1st. Vice, Mary Rodeck.

The Christmas exercises Tuesday evening were unusually successful and entertaining. The program varied somewhat from the usual order, and Florence Harris' class won the prize, a giant candy cane, which the members of the class divided among them.

Eleven of the primary class gave a cute little skit. Dressed in feather suits they gave a gobbler dialogue. A very prettily decorated tree added to the joy of the evening.

Improvement Club

The Improvement Club annual banquet will be held at the Coffee Club Friday evening, Jan. 3rd. The following program has been prepared.

Supper at 6 P. M.
Instrumental Music—Orchestra
Male Quartet—
Solo—Mrs. J. F. Wilson.
Solo—Mrs. Powell.
Miss Kennedy, Accompanist.
Business Meeting.
Election of Officers.
Addresses by Rev. Wilson, Mrs. M. J. Wilson, C. H. Whitman, Warren Shelley, Jos. Brooks of S. J. Chamber of Commerce.

What is the Answer?

It happened during the construction of one of Kansas City's skyscrapers. The noon whistle blew, and a plasterer, working on the floor above that on which he had left his street clothes, wanted some change from his pocketbook and ordered his tender to go and get it.

The tender paused. "Look hyah, Mistah Jim," he objected, "if somebody has already stole yo' money, an' I comes back hyah an' tells you dat it's gone yo' is gwine to say I tuk it."

Although struck by the seeming justice of the objection, the plasterer was impatient. "What's the matter with you?" he ejaculated. "Nobody has stolen my money. You go ahead, and if the money is gone I won't blame you."

The tender departed, to return in a few minutes and stand just inside the door. "Well," said the plasterer pointedly.

The tender shuffled his feet, wide eyed and innocent. "It's jes' like I tole yo', boss, jes' like I tole yo'. Somebody done robbed yo'. Dey wuzn' a cent in dem clothes."—Kansas City Star.

A Big Reduction

Before taking an inventory, I will sell goods at a great reduction in price to save wear and loss in value by carrying over my present stock. Come before Jan. 1st.

C. H. Loomis, "The Cherry Ave Jeweler"

Phone San Jose 5408J1.

Congregational Church

Next Sunday evening we are looking forward to a treat, Miss Nellie Arnett recently from Africa will give her second talk on Africa. This time with the aid of the Stereopticon Miss Arnett will give us a glimpse into her own work on the mission field. The slides—70 of them—are beautifully colored, and some of them are made from photos taken by Miss Arnett and others on the field, so her talk will be in the nature of a "personally conducted" tour through her life and work abroad. Those who heard Miss Arnett last time know what a treat is in store for all of us. Come and bring a friend.
GEO. E. ATKINSON, Pastor.

Christian Science Services

In Odd Fellows' Hall every Sunday morning, at 11 o'clock. Subject for Dec. 29—Christian Science. Sunday School 12:15. The public is cordially invited.

MOCK SALAD EASILY MADE

Cook Enthusiastic Over Dish That Should Be Good and Is by No Means Costly.

Any kind of meat may be used. I used roast beef. The recipe makes four large cups: One pint of lean meat, chopped or cut in very small pieces. Season with a level teaspoon of salt, a saltspoon of pepper and a scant teaspoon of sage. Mix thoroughly. Put half a cup of milk in a saucepan; add two tablespoons of dried bread crumbs and cook until smooth. Remove from fire. Add two tablespoons butter and two well beaten eggs. Then add the meat to the bread mixture. When well mixed fill greased custard cups, stand them in a shallow pan of boiling water, covered with greased paper and bake about half an hour in a moderate oven. Earlier in the day make some tomato sauce: one can of tomatoes, two or three onions (if you care for onions), salt and pepper. Cook slowly until the onions are soft. When ready to serve place a generous amount of the sauce upon each plate and turn one of the cups upside down in the center of the sauce. Have the sauce cold and the cup mixture hot. This may sound troublesome, but it is quickly and easily made.—Boston Globe.

NOVELTY IN TABLE COVERS

Of Tapestry Edged With Metal Galleon They Are an Effective Ornament.

Extremely effective are the covers for the table in the library or living room made of tapestry, edged with the metal galleon. The shops offer the wool, or wool and silk tapestry, in unusually handsome combinations of colors. Some tapestries have the metal threads woven into the designs, this being the case especially with the changeable effects. The cover is cut to fit the top exactly or may be made in the form of a long runner hanging well over the ends or sides of the table; or, in some cases, it is made square, hanging down on all four sides.

A banding of the galleon finishes the edge and sometimes a second band, paralleling this a few inches from the edge, is used.

A cover of this sort is not only artistic, but has remarkable wearing qualities.

It may be said in passing that short lengths of the tapestry are often to be found at much under regulation price. Agents' samples are especially well adapted to covers of this sort.

Chocolate Fritters.

One-half cup flour, one teaspoon cream of tartar sifted with the flour, two teaspoons sugar, two tablespoons of milk, one egg, one large teaspoon of cocoa or chocolate, a pinch of salt. Cook in deep fat. Serve with vanilla sauce. Enough for family of three.

Vanilla Sauce—One cup sugar, half teaspoon of cornstarch; mix in the sugar dry, then add half a cup of boiling water, a little at a time. Let it boil five minutes until it looks like slush, then add the yolk of one egg, well beaten, and piece of butter size of walnut. Whip all together well, then add half a teaspoonful of vanilla. Do not boil after the egg is added.

Baked Apples With Icing.

Wash, pare and core as many large apples as are required. Fill the apples with two teaspoonfuls of dried currants, one-quarter teaspoonful of ground cinnamon, one level teaspoonful of butter. Bake them until they are cooked. Let the apples cool and remove them to another dish, ice the tops and sides with any kind of cake icing and put them back into the oven and brown them slightly. After taking them out of the oven place a candied cherry on top of each apple. Serve them with cream.

Good Stove Lining.

A good stove lining, one that will last two years or more, can be made from blue clay. Brick clay, or one that does not contain much sand, is good, also. Clay found in salt water marshes is one of the best for stove linings. The clay must be reduced to a paste, about like putty. The bed for lining should be brushed clean and moistened before the clay is applied. Put on with hands, smooth with a trowel or thin piece of board.—Home Department, National Magazine.

To Make an Asbestos Mat.

An asbestos pad for the table may be made in this way: Get enough asbestos paper to cover the table with double thickness. From a couple of old sheets cut two pieces the size of the table. Baste the asbestos paper between them and quilt it on the sewing machine, using a long stitch. This is necessary, as the paper tears and pulls apart easily. Put this pad on the table under your silence cloth and there will be no marks made on the polished surface by hot dishes.

Celery Toast.

Cut tender stalks of celery into thin slices and cook in salted water till tender. Use but little water, letting it cook slowly so that there is but little left when the celery is done. Add sufficient cream or rich milk to almost cover, season with salt and a dash of cayenne and add sufficient flour moistened in a little cold milk to make a thick, creamy sauce. Put over rounds of buttered toast and serve at once.

POULTRY

DAYLIGHT TESTER FOR EGGS

Michigan Man Has Invention That Will Prove Innovation in Poultry and Produce Business.

An electric daylight egg tester has been invented by Mr. S. J. Fish of Jackson, Mich., which will be an innovation in the poultry and produce business, for it is far ahead of candle-light in a dark room, says the Popular Electricist.

Electric No. 2, as it is called, is about 3 feet in length and contains a belt, with small metal trays about 6 inches apart for holding the eggs, which is run over rollers at each end of the case by the aid of a crank. This machine is equipped with an electric lamp and a cord attachable to any electric light socket.

A hood with an opening is placed over the lamp and, as the egg passes over it, the light flashes on automatically, remaining only so long as

Egg Tester.

the egg is under examination; a perfect one is a clear orange color, while a bad one is black; the eggs turn automatically on the belt, enabling the tester to examine from all sides. The good eggs are allowed to roll out on a canvas table, which is done without danger of breakage, while the operator discards the ones which are spoiled.

When the ordinary lighting current cannot be secured, the machine is equipped with 24 dry batteries in multiple series, which furnish current for low voltage electric lamps.

An expert and two helpers can test about 80 cases per day with absolutely no danger from fire. Eggs are tested in a daylight room, and with great rapidity.

PROPER FEEDS FOR POULTRY

Best Rule Is to Watch Fowls and Give Them What They Will Clean Up—Milk Is Excellent.

Generally speaking, the poultryman need not worry much about feeding formulas. If he will feed about one-third as much corn as all other grains and feed animal and vegetable feeds in connection he will get fairly satisfactory results. Those who are accustomed to compounding rations might remember that a ratio of about 1.5 is considered a good ration for laying hens and 1.6 a good one for fattening poultry of all kinds.

Fowls require the equivalent of about 27 pounds of dry feed for each 500 pounds of live weight. That is, 100 hens weighing 5 pounds each would require about 27 pounds of dry matter each day. If they are given milk, green, or other wet or juicy feeds, they will require less grain. About 4 ounces of dry matter per day is the quantity required for best results.

The very best rule is to watch the fowls and feed them about all they will eat. It is not a good plan to allow feed to lie uneaten. There is no danger of the hens becoming too fat as long as they are kept busy scratching for their feed. It is the fat hen that lays the eggs regularly.

GOOD POULTRY FEED TROUGH

Useful for All Kinds of Poultry and So Self-Explanatory That No Description Is Necessary.

The accompanying illustration, which shows a feeding trough very useful for all kinds of poultry, is so plainly self-explanatory that no description is necessary, says the Iowa Homestead. By the use of this trough

Poultry Feed Trough.

so food can be wasted nor can the fowls get into the trough with their feet and thus soil it or impair the feeding value of the food.

Green Food for Winter.

Sprouted oats, cabbage and brittle, well-kept turnips furnish the best green poultry food for winter. Alfalfa or clover leaves or sweepings from the big barn floor, if scalded up and fed clear or with a little ground feed, will largely take the place of green food and in a way is better than all other green stuff without it.

Cleaning Poultry House.

In cleaning out an old hen house nothing is better than to wash down the walls with strong carbolic acid water, using an old broom. Then whitewash.

SECURING EGGS IN WINTER

Farmer Has Discovered That It Is Profitable to Have Commodious and Comfortable Houses.

The farmer has become wise to the fact that it is possible to have winter eggs, which no longer is an idle dream, as was the belief in the days of our forefathers. The farmer, too, has discovered that it is economy to have commodious, comfortable winter houses, and that for success there must not be a single mongrel permitted on the place. He has even gone a step farther, and invested in incubators and brooders that he may devote a part of the winter months to profit instead of comparative idleness.

In short, he has in operation a complete poultry plant, and it has proved to be the best crop on the farm. That is the revelation of today, and the farmer makes the most of it for the reason that he has the proper facilities.

The purebreds of the present day are so superior in utility that one seldom comes across a flock of cross-breeds, and the one that keeps mongrels is not of the class that is making a success.

The fanciers of today deserve the credit for this change. It was due to their skill that health, ruggedness and practical qualifications became a part of the make-up of their breeds. So sharp has become competition in this line that the breeders of different varieties are working for egg records and meat supplies in preference to show requirements. Even the American Standard of Perfection has modified the laws of breeding so that utility will not be sacrificed. Truly we have entered an era when poultry becomes the food fowl instead of the show bird.

It has been proved that, properly bred, pure bloods are more prolific layers, give a more uniform size and color to the eggs, and the young stock mature more uniformly and give better carcasses, and utilize the food consumed to better advantage, than is the case with either crossbreds or mongrels.

CHOPPER FOR POULTRY FEED

Handy Device Is Shown in Illustration for Cutting Roots and for Mixing Other Things.

The illustration shows a handy device for cutting roots for food, and for chopping and mixing stale bread, potatoes, peelings, refuse fruit, etc., for poultry. Any blacksmith can make the chopper at little cost, says the Popular Mechanics. For the cutting blades use two pieces of steel a little heavier than oil-barrel hoops, each 1½ inches wide and 8 inches long. Procure a 1½-inch iron rod, about 3

A Poultry-Food Chopper.

feet long, bend one end in the shape of a spade handle and split the other end for a distance of about 2½ inches. Sharpen one edge of each blade and curve the metal slightly. Lay the two blades together with the convex sides touching in the center and insert them in the slit in the handle end. They are riveted or welded in place. Heat and bend the blades at right angles.

Many of the materials mentioned for poultry foods may be chopped in an ordinary pail having a strong bottom, but it is best to make a box, about 1½ feet square and with a plank bottom, for use with the chopper.

POULTRY NOTES

A successful poultryman is a good feeder.

Poultry will not thrive upon an exclusive grain diet.

The floor of the poultry house should be so constructed and of such material that it is dry.

Selection of breeding stock is one of the most important duties connected with the poultryman's work.

The busy hen is the money maker. The singing hen is a laying hen. Be wise and choose accordingly.

Put the plow or spade into every portion of the poultry yards, and see how the hens will thank you.

The quality of eggs has much to do with their selling ability. The better the quality the better they sell.

Fowls that are compelled to sleep in a draught contract colds, which often develop into bronchitis, diphtheria or roup.

If there be one thing more essential to success in poultry rearing than another, it is to go slow, and learn wisdom as you go.

To be successful in any line of work requires forethought and judicious planning. Especially is this so in the raising of poultry.

No poultry farm is complete without a few cows, as skim milk is not only a cheap feed, but a profitable one for fowls at all ages.

When you confine your birds in coops you should be very careful not to feed too heavily or you will give them bowel complaint.

The necessity of thoroughly cleaning the poultry houses at this season of the year is obvious to all who give the subject much thought.

One person on the farm should have charge of the poultry, and that person should not be the hired man or boy, but some member of the family

ANOTHER GOOD ROAD IN WISCONSIN

The Illustration Shows a Nine-Foot Stone Road Near La Crosse, Wis.

In writing of cost of roads and value, an expert shows that if 20 per cent of the country's highways were put in good condition, at least \$250,000,000 would be saved in the moving of the crops of the year 1912. This amount would suffice to improve 5,000 miles of roads and thus in the course of five years 250,000 miles of highway would be developed to meet the needs

of the farm, so much in evidence.

When it is reflected that the average cost of hauling in the United States is 25 cents per ton per mile as compared with only 2 cents per ton per mile in France and Germany and England, the urgent economic need of highway improvement and extension in this country becomes painfully evident.

GOOD ROADS

COUNTRY ROAD WORK

Very Little Progress Has Been Made in Building.

One Reason Is Lack of Business Methods Same as Employed in Many Other Enterprises—Tax Payers' Money Is Wasted.

The bad country road is a back number. It is as much out of place and date as the grain cradle or flail threshers. They had good roads way back in grandfather's time—ever since people began to travel, to haul stuff in modern narrow-tired wagons. They had good roads way back in Caesar's time in the old world. What progress have we made in road building? Very little, says the Western Farmer. Over three-fourths of all the miles of country roads in the northwest are still unimproved. In most states 90 per cent would be more nearly correct. Of course every bit of road gets its annual tearing up by the road officials who draw a salary for calling it road "improvement."

There's a reason why country roads are bad. Can't lay it to the weather or the road material either. As one farmer says: "I have seen in 23 years hundreds of thousands of dollars of tax payers' money expended on the roads in town and country, but after all our roads are still as bad as ever." As bad as ever—what a comment to make upon the appearance of country homes had it been said that the farms had not been improved in 23 years! But no, the farms have improved, the towns have grown and business places are better than they were 23 years ago, but the country roads are "as bad as ever" after spending fortunes upon them.

The reason is that road building is not done in the same businesslike manner that other things are managed. We have seen the creamery come into existence. We have seen the skilled butter maker turning out cartloads of butter finer than that made by the farmers before the creameries took the job off their hands. Science and business methods have made the change in butter making. But the roads are "as bad as ever" because it is a farmer's job to be done when it suits his convenience. It is done by men who have never studied the science of road building. It is done in a hit-and-miss method, devoid of business principles. This is why hundreds of thousands of the taxpayers' money has failed to make the roads any better. And again we say it is not because of bad weather or poor road-building material. The buttermaker takes bad cream and makes pretty good butter from it because he knows how. Of course he could do better with good cream. Likewise the skilled road builder can make good roads of just plain country dirt, because he knows how. Of course, he could do better with crushed rock and all that. It is not a scarcity of money or of material, but a lack of the right system that is responsible for bad roads.

Dollar for dollar is a good plan. What we want to see is a dollar's worth of good roads for a dollar spent

in road tax. And why not have it? Isn't it about time to quit pouring money into a mudhole? Most roads could have been nicely paved with the dollars they have cost since first laid out. Where has that money gone? Don't cry "graft." Of course there has been too much graft—ah, politics, there's the rub—but there has been no political graft to speak of in connection with country roads. The trouble is the system is and has been wrong. Road building is for the public good; just as mail carrying is. The mail carriers are under civil service, out of politics entirely. They are paid for knowing their business. They must give a dollar's worth of service for a dollar in pay. Why not handle the road problem that way? Remove the road boss from politics and make him pass an examination showing his efficiency. Keep him just as long as he does his work well. Then you will see good dirt roads wherever there is nothing better. Enough money will soon be saved in road tax to macadamize every mile of the main traveled country roads.

TREES ALONG THE HIGHWAYS

Every Drive Through the Country Gives Evidence of Need of Prompt and Effective Action.

"The civic committee of the Alabama Federation of Women's clubs is doing a good thing in starting a movement for the preservation of trees along our highways," said a prominent citizen of Alabama, according to the Birmingham Age Herald. "Mrs. Alston Fitts of Tuscaloosa is chairman of the civic committee, and she has issued an address in circular form which should stir up interest in this work. After calling attention to the nation wide movement for 'shady ways' and an appeal for a general rally for their preservation, she says:

"Every drive through the country gives evidence of the need of prompt action, for the trees are at the mercy of ever changing road workers and are ruthlessly cut down. These shady highways are a great asset to our state. Increasing numbers of tourists are motoring over them and are thereby awakening to our wonderful resources. Our own people are finding on these highways the playground needed for recreation and relaxation. The farmer finds comfort and pleasure for himself and his horses in the day's work, to and from market, field and home.

"Let every woman's club in Alabama join in the crusade without delay. Talk about it in your homes and in your clubs and have your schools champion these God-given forest trees, true friends, alike to rich and poor, young and old. Every school improvement association in Alabama is asked to call a meeting and frame and sign a petition and present it to their county commissioners asking their authority to prevent roadworkers from cutting down these trees. Let us all together arouse such interest and love for these trees, that when a bill is presented in the next legislature for their legal preservation it may be passed unanimously."

Clean Up the Roadside.

The fall of the year is a good time to clean up the unsightly roadside. The dry grass and weeds will burn, and when destroyed cease to become an eyesore all the winter months. Any green bush can be cut and burned with the dried weeds and grass and will improve the roadside to have this done now.

Planting Apple Trees.

The best time to plant apple trees is as soon as most of the leaves have fallen. The roots being then in an active state, and the ground still retaining a certain amount of heat, they will form new roots before winter, which is a material advantage.

CAP and BELLS

ONE OBJECTION IN RESERVE

Husband Was Willing to Concede Everything to Wife's Wishes With Exception of Baseball.

"So you have given up smoking?"

"Yes."

"Too costly, or did you have reason to believe it was bad for your nerves?"

"No, I quit because my wife ordered me to do so."

"Did you shave off your mustache because your wife ordered you to do so?"

"You've guessed it the first time."

"I suppose you would part your hair in the middle if your wife told you that was where she wanted it parted."

"Certainly."

"I hear that you have quit sending money to your mother because your wife objected."

"Yes. I tried to do it secretly, but she found it out."

"I should think you'd spunk up and assert your manhood."

"Just you wait. Some day my wife will order me to quit going to ball games, and then she'll find out where she gets off."

Gradual Spread of Knowledge. "Is this the information editor?"

"Yes."

"Will you please tell me why 'straw' votes are so called?"

"Because straws show which way the wind blows."

"Then I've lost a pound of chocolate creams. I had an idea that it was because they packed them in bales and sold them."

Comparatively Easy. "An aviator is building a machine to fly across the Atlantic."

"That has already been done."

"You mean to tell me that men have already flown across the Atlantic?"

"No, merely that men have already built machines to do it."

VERY.

Daisy—Is she so economical? Maisie—Well, she's saving her wedding dress for a possible second marriage.

Saw It.

"Did you see my painting at the exhibition?"

"I did. It was the only picture I examined with care."

"Splendid! Why was that?"

"Because nobody else was looking at it."

Must Be Black.

"She wants a black dog. I don't think this dog will be black enough."

"Why must she have such a black dog?"

"She's in mourning for her father-in-law. Didn't you know?"

She Was Anticipating.

"When he proposed to her she knocked him down."

"Gracious! What did he say to that?"

"He yelled: 'Hold on! Hold on! We ain't married yet!'"

Help Some.

"After all," remarked Mr. Growcher, "the trusts are of great benefit to the public."

"In what way?"

"They give people with family troubles something to talk about."

Style Note.

"Why do your oxen have blinders? There are no autos or railroads around here."

In Chicago.

Mrs. Dearborn—Who is the gentleman over in the corner, frowning at you, dear?

Mrs. Wabash (thrice married)—Oh, that's next to my last husband.

NEVER WITH RED HAIR

HISTORY RECORDS NO GREAT GENIUS THUS ADORNED.

Men of Eminence Have Been, but Not Those of Genuine and Deathless Fame—As to Beards and Ringlets.

History shows that no great genius ever had red hair. Alone among the poets of the world was Swinburne, whose hair was distinctly reddish, and among the great reformers only John Bunyan's hair was really red. The ston-pure carrotty head, however, appears nowhere linked to world fame.

The flaxen-haired blonde or the man whose hair when an adult is a true yellow also remains marked apart as being unlikely to possess genius. Should one such be, his only companion will be Thackeray, whose hair is described as yellow. Mr. Charles Kassel has reviewed the biographies of most of the eminent people of the world's histories and tabulated his results so far as the color of the hair is concerned.

Dark brown to black is the prevailing hue on the heads of great men. A list of fifty names has been compiled in which the color of the hair is given by biographers, and 90 per cent. are dark brown or black. There is not, strange to say, a single mention of premature grayness, nor a single case of that ashen brown hair known as "singed" or "mouse color."

The structure of the hair—whether straight or curly—is given in twenty-six of Mr. Kassel's list of geniuses, and of these all but four possessed curly or wavy hair. It is extremely notable that of the remaining four, Napoleon and Andrew Jackson were the two remarkable for "wavy hair," and that James Russell Lowell and Greig were those having lank straight hair. The poet's "ringlets" and the musician's shock of hair are by this list seen not to be mere accidents, but in some strange way are co-ordinated to their powers and the general popular instinct is not at fault.

The color of beards also arouses many points of interest. All the ancient tapestries show Cain and Judas Iscariot with yellow or red beards, and Pontius Pilate in ancient art always was given a beard. (Being a Roman of good family, he probably had no beard, but those details did not trouble the old masters.) A reddish beard, however, does not carry the significance that goes with red hair, for a large number of eminent men with dark brown hair have had reddish beards. Sometimes the eyelashes have been ruddy, Savonarola, who had almost black hair, having startlingly red eyebrows and eyelashes. But, as a general rule here also, a silky brown beard when accompanied by fine curling dark-brown hair, is the most usual characteristic shown in the biographies of those men whose names have been handed down to fame.—New York World.

Honorable Career Rewarded.

Professor Luigi Pagliani, who represented the Italian government at the Congress of Hygiene and Demography, held in Washington recently, has returned home, after studying sanitary conditions in several large eastern cities. He is professor of hygiene and dean of the medical faculty of the University of Turin, and was founder of the first chair of hygiene in his country. While director of the department of health, Dr. Pagliani stamped out the cholera in the memorable campaign of 1886-89. In recognition of his good work the Italian government has awarded him the Maurizian Order in the grade of commander, and the crown of Italy as a grand officer. He is also an officer of the French Legion of Honor, a member of the Academy of Medicine of Paris, and of the Royal Sanitary Institute of London.

Out of the Past.

Not long ago, from the clay of a railway cutting near Spokane, Wash., there was taken a little bit of vegetable fiber—the leaf of a gingko tree which must have flourished something like 100,000 years ago. There are fossils of even greater age, of course, but this leaf is still a leaf, not a mere imprint in stone; and it is undoubtedly the oldest known bit of vegetable matter in the world.

The particular species to which it belonged became extinct long ago; its only surviving relative is the gingko tree of Japan. Its appearance at the point where it was found proves to geologists that it grew and fell when the Cascade and Coast Range mountains had not yet been formed, and the Rockies themselves were young.

Vegetarian Tips.

The man who had forsaken meat wound up his first vegetarian dinner with the accustomed tip. The next day the service was indifferent, the third day it was abominable.

"What's the matter with that fellow, anyhow?" he growled. "He used to be a good waiter. Now he simply throws things at you."

"That's because you don't tip him enough," said the man opposite. "Waiters always expect a bigger tip for serving a vegetarian meals. It takes such a variety of things to make up for meat that they have to handle more dishes and make more trips to the kitchen. Any good waiter would rather serve one meat dinner than two of vegetables, and unless he gets tipped generously he gets ugly."

IN THE BULGARIAN CAPITAL

OLD CATHEDRAL AT SOFIA

LEAST known of all cities of Europe, for its size and modernity, at least, is Sofia, capital of Bulgaria, focal-point for the direction of revolution in Macedonia, heart of the camerillas of Balkan diplomats and city of strange and curious populace, all in one.

Last night the train came into Sofia too late to permit of even the hastiest inspection. Today we breakfast on the portico of a modern, well-kept hotel, overlooking a busy street; just such a street as one will find in thousands of American towns, where the street car is only run every 15 minutes and the electric lights may be interspersed only semi-occasionally between corners. That is the first impression of the capital of Bulgaria, the city of revolutionists, the headquarters of the bloody Macedonian committee, the place where was hatched the conspiracy against the American missionary, Miss Stone, and from which there emanate, constantly, plots against the sultan; the seat of secession and insurrection and everything else likely to overthrow the balance of power and plunge southern Europe in war! Yet, despite that, I would rather be left alone in Sofia, Bulgaria, than in a town in Arizona at midnight.

A Picturesque Capital.

Bulgaria is picturesque and its capital is particularly so. Pretty peasant girls throng the streets, dressed in long, lavender skirts, from which emerge just a few inches of white underskirt, gay in its fringe; and above this there hangs a cloak of dark lavender, covered with embroidery. Over the bosom the girls wear the heavy silver dowry, which jingles merrily as they pass.

Everybody is bound for the weekly market, and, as is the invariable rule in Balkan travel, the tourist, whenever he is fortunate enough to strike market day, follows the people to the bazaar. Over a booth of little horn knives we stop a moment to watch a pair of lovers, the girl conspicuous for a heavily-worked apron of green, and with a lavender cap, worn to inclose two thin braids of hair. Great cords are drawn across her breast by way of ornament and she is pretty enough for a faded western globe trotter to fall in love with on the spot. Beyond is a man whose home-woven rug, on a shoulder, tempt as he cries: "Only \$21." At home they would be \$20 or \$30.

We are in the quarter devoted to fruit, a lively one on the market. A pome like the pomegranate but filled with tiny red seeds, and known as the Maravi, is everywhere. Also there are grapes and plums, lemons, peaches and apples, and, among these, dishes of cottage cheese. Beyond are the vegetables, mangoes and cauliflowers, potatoes and egg-plant, okra, oyster-cabbage, pickles and tomatoes, spinach, cabbage, red cabbage and peppers, all in picturesque confusion. Onions, tied in bunches, much as is garlic at home, grace other of the brown wicker baskets, appetizing in their cleanliness, on the racks before the stalls.

But we come not to buy—not even the great Bulgur leek—but to see the people, the picturesque peasantry of southern Bulgaria. To the designers of women's gowns and fashion plates a visit here would repay. Every village's quota is dressed exactly alike, even to the stitching. Vest fronts of lavender and heavy silver belt buckles seem the only points of universal similarity.

Many of the folk of younger age have a V of beading on the yoke, and quite a number wear freshly-cut dahlias banked in the hair until they resemble Maori princesses, but this style is not ubiquitous.

Among the second-hand stores of another quarter of town-market one sees the Moslem women, noticeable for the large portion of the face they expose at this place.

We pass through an aisle lined with bunches of shoes, slippers, or, better, even, sandals—red or yellow. We enter a court completely hung with brilliant footwear. It is crowded with peasants. Blue velvet skirts, fringed with lace; caps of blue lining, with

fur protruding from the edge; long, black cloaks, with a hem of gilt embroidery; longer white skirts, edged in red lace; pale blue kerchiefs about the head, hair down the owner's back in a dozen tiny strands like proverbial Topsyies at home, and each with a ribbon of another color. So the picture shifts and scintillates and changes ever, as in a kaleidoscope, before our eyes.

Revolutionists at Home.

One has a wonderful opportunity here to see how these revolutionists conduct themselves. A woman has a bunch of chickens by the legs in one hand, trying to sell. A man, near-by, has a great band about the waist to which hangs a pannier with coke. Coke is the soft coal of Bulgaria. Another hawk has pigeons in baskets, for the Bulgur is fond of these. In other baskets, or suspended from either end of a pole worn across the shoulders, are rabbits fresh from the Balkan wilderness. Turkeys, too, half wild, are carried in the same fashion.

The young market girls are pretty and their wares are the best of their sort. Many of the maidens have in their care large tin boxes of mushrooms, which are almost as plentiful as potatoes, and are frequently found in large, rounded trays on the sidewalks over the city. Fisherboys, with nets over the shoulder, as in pictures of the old "Arabian Nights," stop to chat with them while standing guard over like trays of river fish. Here is a man with sponges in one hand and fowl in another. Yonder a woman is selling spindles, sitting beside a basket of them in the broiling sun. A squeal, and a lad goes by with a live pig under his arms. A cry, and the toy-seller is upon us. Women jingle as they pass for the silver bracelets on their arm.

Then we enter another quarter of the marketplace. Here most of the women bear black and white bags in which they carry their purchases, and here the hair is divided into still more numerous braids. I counted 17 of these on one woman's back while we were watching the spectacle.

To pick this melee apart would be to spoil it. There's a beggar, his arms crippled when a babe, that he might become a mendicant. Beyond is a girl who has each braid end in a ribbon and coin, and he covets these as she passes. Now and then a Turk will pass, selling Turkish coffee. So much for the market at present.

Gypsies are as numerous as the children; but even more plentiful are the harkers. They remind one of old London by their number.

Among the booths where the wooden water-flasks and the heavy peasant knives are sold, is the Greek cathedral. The czar of Russia has recently given a fund to this. Across the front of the church a wooden screen, known as the iconostas, is built, heavily painted in white and covered over with patterns of gray. On this the icons, or sacred paintings, are hung, but the workmanship of these is poor. Great pillars, in double rows, support the church itself, and on a stand beside one of these a "treasure" is shown. This latter is a glass case containing 13 medallions, about 5x3 inches in size, each exquisitely made miniatures from the life of Christ. Heavy crystal chandeliers serve to illumine the treasure. Besides, there are great candelabra illumining a tomb, covered by a canopy of red, with silver plates and heavy velvet cloth of purple, draped between. The whole interior of the church appears lofty, and yet in comparison to other Greek cathedrals is not uninspiring. The mighty candlesticks, of the thickness of tree trunks, that are intended to be the piece de resistance of the church, resemble exaggerated Turkish coffee mills more than anything along lines artistic. The church, however, is interesting as being the place of worship of King Ferdinand and the royal family of Bulgaria, and next the archimandrite's seat (of heavy carved oak), there is a heavily-gilded canopy of scarlet reserved for their use.

W.L. DOUGLAS SHOES

\$3.00 \$3.50 \$4.00 \$4.50 AND \$5.00

FOR MEN AND WOMEN
Boys wear W. L. Douglas \$2.00, \$2.50 & \$3.00 School Shoes, because one pair will positively outwear two pairs of ordinary shoes, same as the men's shoes. W. L. Douglas makes and sells more \$3.00, \$3.50 & \$4.00 shoes than any other manufacturer in the world.

THE STANDARD OF QUALITY FOR OVER 30 YEARS.

The workmanship which has made W. L. Douglas shoes famous the world over is maintained in every pair.

Ask your dealer to show you W. L. Douglas latest fashions for fall and winter wear, notice the *short vamp* which make the foot look smaller, points in a shoe particularly desired by young men. Also the *conservative styles* which have made W. L. Douglas shoes a household word everywhere.

If you could visit W. L. Douglas large factories at Brockton, Mass., and see for yourself how carefully W. L. Douglas shoes are made, you would then understand why they are warranted to fit better, look better, hold their shape and wear longer than any other make for the price.

Fast Color Eyelets.

CAUTION.—To protect you against inferior shoes, W. L. Douglas stamps his name on the bottom. Look for the stamp. Beware of substitutes. W. L. Douglas shoes are sold in 78 own stores and shoe dealers everywhere. No matter where you live, they are within your reach. If your dealer cannot supply you, write direct to factory for catalog showing how to order by mail. Shoes sent everywhere, delivery charges prepaid. W. L. Douglas, Brockton, Mass.

BUNCH OF GOOD ONES

SOME OF THE BEST OF THE APPROVED RECIPES.

Not All New Ideas, but All Are Worth Remembering—Especially That Will Suit Those Fond of Peppermints.

Squash Fritters—One pint of cooked squash, one pint of milk, three eggs, and a little salt. Sufficient flour to make them turn easily on the griddle.

Custard Sauce—Beat one egg and another yolk slightly, add three table-spoons sugar, and a few grains of salt, then stir constantly while adding gradually one and one-half cups hot milk. Cook in a double boiler, continue stirring until mixture thickens and a coating is formed on spoon. Strain, flavor with vanilla, one-half teaspoonful.

Fried Chicken—Cut the chicken into six or eight pieces and season well with salt and pepper. Dip in beaten eggs and then in fine bread crumbs in which there is a teaspoonful of chopped parsley to every small cup of crumbs. Dip again in eggs and crumbs and fry in deep boiling fat. Cover the center of a cold dish with a nice white sauce.

Peppermints—If you want a good recipe for peppermints here it is: Two cups of sugar, one-half cup of milk, boil ten minutes, then add two teaspoonfuls of peppermint and beat till white and creamy and drop on buttered paper; be sure and get it thick enough. Keep a basin of hot water near so if it gets too stiff you can melt it a little.

Escalloped Salmon—Remove the bones and pieces of skin from a can of salmon and break the fish into small pieces. Put alternate layers of fish and bread crumbs into a buttered baking dish, having top layer of crumbs. Dot top with pieces of butter and pour in milk until it can be seen around edges. Bake about half an hour.

Endive Salad—Use the endive plant as you would lettuce. It is considered better than lettuce, being more bleached and very tender. I like it best served by itself as a salad, dressed with French dressing, made as follows: Two table-spoons vinegar and four table-spoons olive oil mixed well, add one pinch of salt and a little red pepper. Pour over chilled endive plant and serve.

Delicious Stew.

I use a small agate kettle and set it inside of my large boiler. Keep plenty of water in the large boiler and keep it boiling hard. One pound of stew beef, two pounds pork chops, two onions. Put in a layer of pork, then a layer of beef and a little onion, season each layer with salt and pepper. Continue until all the meat is used. Do not put any water on the meat, but cover as closely as possible and set in the large boiler of boiling water. Put a cover on the large boiler, too. Do not uncover the small boiler for three and one-half hours, then you will find lots of gravy on the meat.—Exchange.

Hints on Cooking Eggs.

Use a vessel with straight sides (a quart measure will do), because it is easier to keep water up to the desired temperature than in a vessel with flaring sides. Have the water boiling hot. Drop the eggs in and keep the temperature up to boiling, but do not let it boil. Let eggs remain in the water eight or ten minutes; the whites should be jelly-like, not hard, and the yolk should also be cooked, but not hard. Cooked in this way, eggs are more palatable.—Home Department, National Magazine.

Hamburger Steak.

Cook one heaping cup of macaroni in boiling salted water 20 minutes; while it is cooking fry two large onions and have your hamburger ready. Then butter a baking dish and put in a layer of macaroni, hamburger, onions and one cup of tomatoes (hot); repeat and cook about half an hour in hot oven. Salt and pepper to taste. You can reheat and make a good hearty dish.

Why cough? Stop it!

Stop coughing! Coughing rasps and tears. Stop it! Coughing prepares the throat and lungs for more trouble. Stop it! There is nothing so bad for a cough as coughing. Stop it! Ayer's Cherry Pectoral is a medicine for coughs and colds, a regular doctor's medicine. Sold for seventy years. Use it! Ask your doctor if this is not good advice.

Unless there is daily action of the bowels, poisonous products are absorbed, causing headache, biliousness, nausea, dyspepsia. We wish you would ask your doctor about correcting your constipation by taking laxative doses of Ayer's Pills.

Made by the J. C. AYER CO., Lowell, Mass.

Away From Dust of Autos.

The increase of motoring and the consequent increase of dust have, to some considerable extent, changed the value of villa and hotel sites in visitors' resorts. The chic, especially in the south of France and Italy, is now much in favor of houses well away from the main road, and even well outside towns.

The Real Measure.

Your rank as a living creature is determined by the height and breadth of your love.—Ruskin.

Coffee Mold.

Scald one pint of milk, dissolve two heaping table-spoons cornstarch (I prefer flour) in a little cold milk or water, add two table-spoons sugar, pinch of salt, half a cup strong fresh coffee. Stir this into the scalded milk and cook until it thickens. Turn into a mold and set it aside to cool. Serve with cream and sugar. It is called coffee mold.

Sausages Cooked in Batter.

Four table-spoons of flour, one pint of milk, one egg. Beat the batter five minutes, pour boiling water over one pound of sausage and pull off the skins. Place in baking dish, pour the batter over them and bake till nice and brown on top.

Brownies.

Cup cream, one-third cup of butter and one-third cup of powdered sugar. Add one-third cup of molasses, one egg, seven-eighths of a cup of flour one cup chopped pecan nuts. Bake in eclairs tins with one-half nut on top of each cake.

Coffee Marshmallow Jelly.

Make plain coffee jelly, not too stiff, and when it has set serve in stemmed glasses, with melted marshmallow poured over it. Decorate with a whole marshmallow and serve.

A COLD WAVE

causes anxiety among those who are sickly and run down, whose blood is impoverished, and vitality low; but don't remain in that condition.

Too Many Babies Born?

Can we not see, right here in our own surroundings, that altogether too many babies are born now? Better by far fewer babies, and these well fed, well clothed, well cared for physically, morally and mentally—if we would expect a strong, hardy race. If race suicide is ever checked it will not be by bringing into the world ill-fed, poorly clothed, worse fathered children, but rather by well-directed efforts to save the children who die unnecessarily.—Dr. George T. Finch in Leslie's.

House Boss in Egypt.

Old Mr. Egyptian carried a stick on a small club about the house with him and laid it upon his women like a thousand of brick whenever they disobeyed or displeased him. In the graves the mummies show that nearly every woman had a forearm fracture. When Mr. Egyptian came home in a bad humor he would sail into her with a stiff stick, and as the arm was thrown to protect the face it was generally broken while warding off the blow.

Woman's Sense of Honor.

On this point women are still not entirely in agreement. "Sense of honor?" said one young woman to whom the question was brought up; "Women's sense of honor? They haven't any." On the other hand, an older lady—one who is wise through long and sweet living—answered, "Sense of honor? Of course women have it—as high as any man's. Only—I should want to choose my woman." Where, then, does the truth lie?—Atlantic.

Will Preserve Aged Tree.

On the Canandaigua lake shore highway, at Tichenor Springs, stands a venerable tree, which, experts declare, is not less than eight hundred years old. Recently improvements at this point were begun, which, it was thought, would necessitate its removal. In response to popular protest the highway commission has decided to let it stand.—Waterloo (N. Y.) Observer.

You Can Get Allen's Foot-Ease FREE.

Write Allen S. Olmsted, Le Roy, N. Y., for a free sample of Allen's Foot-Ease. It cures sweating, hot, swollen, aching feet. It makes new or tight shoes easy. A certain cure for corns, ingrowing nails and bunions. All druggists sell it. 25c. Don't accept any substitute.—Adv.

Remember.

Do you remember, if you lose heart about your work, that none of it is lost; that the good of every good deed remains, and works on forever; and all that falls and is lost is the outside shell of the thing; which, perhaps might have been better done, but has nothing to do with the real good you have done to men's hearts.—Charles Kingsley.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period. Adv.

Aerial Photographs Next.

The inventor of a special camera, says that among other uses for photography from the sky view point, land companies will be able to display aerial photographs of suburban development, merchants to advertise their location in a city. He says genuine motion pictures of journeys through cloudland will some day be as common as present day snapshots.

Pettit's Eye Salve

QUICK RELIEF EYE TROUBLES

Comfort in the Thought.

Patricia possesses the four-year-old's usual aversion to water for cleansing purposes and is most sparing in its application to her small face. The other evening before going to bed she gave her reflection in the mirror a careful scrutiny and remarked: "Well, my face is pretty clean. I believe it'll do for tomorrow."

May Be Something in Them.

A former convict says that crime is not a disease, but a responsible act, that criminals are treated too leniently, and that honest men pay for the mistakes of the law's lax punishment. His theories are worth investigating.

Apparently.

It appears to be necessary for the people to do a great deal of scolding and to engage pretty continuously in strong-arm work for the purpose of getting what is theirs.

Notice to Subscribers

A blue circle around this notice indicates that your subscription has expired and it is the hope of the editor that you will renew for another year. If we do not hear from you at once we will understand that you wish the paper continued. If you should see a blue cross thru this notice, that means that the Post Office forbids us sending the paper any longer without paying an increased rate of postage; therefore this is the last paper you will receive until accounts are squared up. We will be liable to a fine for misuse of the mails if the paper is continued.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, O.
Sold by all Druggists, 75c.

CAMPBELL INTERURBAN PRESS

THE END OF TARTAR RULE

WITH the expulsion of the Turks from the Balkan states and the throwing off of the Manchu yoke by the Chinese, the present year should go down in history as one of glorious memory, by reason of the release of hundreds of millions of human toilers from tyrannical and incompetent rule. Time was when practically the whole of the Asiatic continent, a considerable portion of Africa and four-fifths of Europe was under the rule of the Tartars. Tartar rule was always preceded by a devastating war of invasion, wherein the conquerors reduced their vassals to a condition of terrified helplessness. After their conquests these human wolves quartered their armies upon their subjects and proceeded to enjoy themselves in their own peculiar way.

The Huns who under Attila devastated and conquered a large portion of southeastern Europe; the so-called Golden Horde under the Grand Khans of Tartary, who conquered and for two hundred years held Russia enslaved; the Turks who over-ran Asia Minor and the Balkan states and ruled them for near five hundred years, and the Manchu Tartars who made conquest of China some three centuries ago, all pursued precisely the same course of action. They simply quartered themselves upon their vassals, filled their harems with their fairest daughters, taxed them to the limit and slaughtered them without mercy when they protested. The policy of the Tartars has always been to hold their subjects in ignorance and helpless poverty. They were jealous of interference by enlightened foreigners and they have been as intolerant toward missionaries and travelers as circumstances would permit. The chief foreign haters of China were the Manchu Tartars, not the true Chinese.

Every man and woman in whose soul there is an ounce of humanitarian sentiment will rejoice at the downfall and humiliation of the Turk; for he has proved himself an unworthy ruler of other races. The toiling millions of China have but recently been emancipated from Tartar rule, and are struggling with the problem of self-government. The down-trodden people of the Balkan states have been carrying on an unequal struggle for freedom for many years, and would have achieved success long ago had it not been for the contemptible jealousies of the European powers who preferred to see them enslaved rather than lose their profitable trade monopolies with the Turks.—Sunnyvale Standard.

ONE thing that speaks very strongly in favor of W. H. Kelly of Palo Alto for State Senator is the fact that the republican papers of his district are for him, a democrat, as a man not as a part of the political machine. Mr. Kelly is a good man for the place and, altho he is not in our district, we heartily endorse him to our readers in his district. He has already done much for his town and county and is deserving of the position where he can do more.

EVERY member of the Campbell Improvement Club should make a special effort, and some sacrifice if necessary to attend the election of officers and annual banquet of the Club, next Friday evening, January 3rd. This will be a big get-together meeting and those who have the interest of Campbell at heart and do not already belong to the Club are extended a hearty invitation to JOIN.

Classification of the Public Lands.

An important and interesting effect upon the scientific work of the Geological Survey has resulted from the work in land classification. The constantly increasing demand for both completeness and exactness of information regarding the mineral resources of the public lands under classification have developed methods and scope of view in this economic work that have exerted a marked influence on the geologic work in other areas.

Thus, the training and methods developed in the course of the classification of the coal lands have brought about higher standards of refinement in stratigraphy, as well as in economic work, in other regions of the country. Another very notable illustration of scientific results springing from the study of economic problems is found in the administration of the Weeks Act, providing for the purchase by the Federal Government of certain forested lands which may affect the flow of navigable streams. The intensive hydrometric experimental studies carried on in order actually to show, in accordance with the terms of the law, the degree of protection afforded by forests to soil and water in certain areas proposed for purchase as national forests have resulted in empirical determinations and demonstrations of high scientific value as well as tangible economic importance.

For Sale

Prune Orchard of 8 and 34-100 acres near Campbell. Has family supply of other fruits and nuts. House acetylene lighted. Barn. Deepwell with power pump. This is a part of the estate of the late G. V. Pomeroy and must be sold. Address: Honer W. Gilpin, Oelrichs, S. D. Administrator
